EDUCATION

SAVEETHA UNIVERSITY
BE in Computer Science
March 2026 (Expected) | Chennai, India
CGPA: 9.19 / 10.0 (3.68/4.0)

SRI CHAITANYA SCHOOL
Higher Secondary Certificate
March 2022 | Bangalore, India
GPA: 3.18 / 4.0

COURSEWORK

UNDERGRADUATE
Algorithmic Thinking
JAVA Development and Solutions **
Computational Thinking
Python Programming **
Mathematical Foundations for Computing **
Computational Logic and Design *
Advanced Object-Oriented Programming *
Operating Systems / Concurrent Programming
*Teaching Assistant
**Master Learner

SKILLS

PROGRAMMING
Proficient: Java • Python • C++
Familiar: Dart • SQL• JavaScript

SOFT SKILLS
•Communication • Team Leadership •Project Management • Time Management

TECHNICAL PROFICIENCIES
Algorithms & Data Structures
Full-Stack Development
Cross-Platform Mobile Development

COMPETITIVE PROGRAMMING
Fundamentals: 60 + Problems Solved
DSA Essentials: 40 + Problems Solved

CERTIFICATIONS

Introduction to Front - End (Meta)
Google AI Essentials
Introduction to Python Programming (edX)
Oracle Java SE 21 Developer (Pursuing)

AWARDS

2025	1st Place	SDG Hackathon Winner
2024	2nd Place	Student Merit Award
2024	Innovative Team	30hr Hackathon
2024	3rd Place	Bug Bounty
2024	Top 1%	Internal Smart India Hack
2024	2nd Place	Code Bounty

TECHNOLOGIES

Proficient : IntelliJ IDEA | Android Studio | Git | GitHub | Firebase | Figma
Familiar: Unreal Engine 5 | Ollama | Open Router | Hugging Face | React | Flutter

EXPERIENCE

BYTE UPRISE | Software Engineer Intern
JAVA | Intellij IDEA | NetBeans IDE
June 2024 – July 2024 | Maharashtra, India

- Led the 2 Java Projects: Developed a scientific calculator and a banking app, showcasing proficiency in software development and application design
- Saved **75 %** of development time by using IntelliJ IDEA and NetBeans, optimizing workflow and enhancing code quality.
- Ranked in the top **10%** for technical skills in Java programming, object-oriented design, GUI development, and debugging

NSIC | App Developer Intern
Dart | Android Studio | Flutter
Dec 2023 – Jan 2024 | Chennai, India

- Developed cross-platform mobile apps using Flutter, ensuring consistent performance and user experience on both Android and iOS with a single codebase
- Gained expertise in Flutter (UI), Java (Android app logic), and Kotlin (modern Android development), demonstrating versatility and adaptability across different technologies.

PROJECTS

COSMOS | Full - Stack Web App | January 2025
React | TypeScript | Tailwind CSS
Source Code | View Demo

- Developed an interactive platform for real-time **space monitoring** and **educational platform**
- Implemented features to bridge the gap between students and space education, aligning with UN's Sustainable Development Goal 4 **(Quality Education)**
- Led development and successfully completed the project under strict 24-hour time constraints, securing first place in the hackathon.
- Integrated a **VR-based** metahuman module to serve as an interactive space guide, enhancing user engagement and learning experience

CARE SAGE | August 2024
Python | Machine Learning

- Created a healthcare app using **AI** and **Python** to offer personalized health tips based on data analysis, helping users improve their well-being
- Used **SVM** and **Decision Tree algorithms** to analyze health data and accurately identify patterns, providing precise recommendations for better health
- Designed the app to give users tailored advice, ensuring each person gets suggestions suited to their unique health needs
